PROFILE

Aspiring software Engineer and curious to learn new things . Our team at Pupilfirst is immersed in advancing web development skills, focusing on HTML, CSS and JavaScript's intricate role in web design. We're crafting new web applications, enhancing existing ones, and solving complex bugs that refine our understanding of HTML, CSS and JavaScript in dynamic, real-world scenarios.

Concurrently, at Anand International College of Engineering, we're delving into the compelling world of AI and Machine Learning, aiming to meld theoretical knowledge with practical experiences to shape a robust foundation in software engineering for the tech industry's future challenges.

Detail-oriented web development trainee with hands-on internship experience centered on JavaScript fundamentals and practical application within real-world projects. Possesses a strong foundation in computer science principles, coupled with a burgeoning expertise in AI and machine learning, demonstrating a commitment to continuous personal and professional growth in dynamic development environments. Actively engaged in collaborative coding efforts to enhance software quality and innovate scalable web solutions.

EDUCATION

Science Maths   Jul 2018 - Mar 2024
Maheshwari Public School

Bachelor of Technology - BTech, Computer Science AI/ML   Aug 2024
Anand International College of Engineering, Jaipur

EXPERIENCE

Trainee   Aug 2024
Pupilfirst, Jaipur, Rajasthan, India
I was a Learning Intern at Pupilfirst, where I gained hands-on experience in real-world web development. I focused on JavaScript, along with HTML and CSS, to build dynamic, responsive web applications. I worked on live projects—fixing bugs, adding features, and mastering DOM manipulation. Collaboration played a key role, and regular feedback helped me improve and write cleaner code. I also documented my learning journey, challenges, and solutions, which sharpened both my technical skills and problem-solving abilities.

Intern   Jul 2024
Younity.in

I was a Sales Intern at Younity, where I developed strong communication and convincing skills. I learned how to effectively engage with clients, understand their needs, and present solutions with confidence. This experience boosted my interpersonal skills and gave me practical exposure to sales and customer interaction.

SKILLS

Web Development   JavaScript

HTML   Teamwork

Communication   Core Java | c++

C++

ACHIEVEMENTS

2x Hackathon Winner
Top 15 in Shankar Global Hackathon

PROJECTS

■ Digital Mental Health Support Web   ■ Crop Recommendation System
